

The most trusted name in moving grain.

1039/1048 Track System*

- 36" wide x 90" long footprint for a compact design and minimal compaction of only 10.05 PSI on the Model 1039 and 10.41 PSI on the Model 1048
- Durable, 10-bolt steel idler wheels
- Manual tensioning system maintains track belt tension
- Two bogie axles (4 wheels) per track
- Triple lip seals and greasable hubs/bearings for easy maintenance

Achieve maximum flotation and smooth transportation, choose our track system!

PARKER- Grain Cart Track Options

1348 Track System*

- 36" wide x 105" long footprint for minimal compaction of only 13.29 PSI
- Durable, 10-bolt steel idler wheels
- Hydraulic-tensioning system maintains track belt tension
- Four pivoting bogie axles (8 wheels) per track allows tracks to "walk" over obstacles. Hydraulic accumulator provides additional cushioning.
- Hubs feature triple-lip seals and heavy duty greasable bearings to withstand tough field conditions
- Hydraulic pressure gauge allows customer to monitor belt tension and also features a valve and hydraulic connector which can be attached to customers tractor for easy maintenance.
- Easily reduce belt tension for routine maintenance

*Model numbers reflect which model grain cart they're available. All Track Systems are factory installed.
